

How to Connect to MSU Open

The MSU Open wireless network was designed to give all visitors to the university Internet access on limited areas of campus, but it's targeted at prospective students and their families. This network is currently available only in Meyer Library and Plaster Student Union on the Springfield campus, and Cass Hall, Garnett Library, and Putnam Student Center on the West Plains campuses. It is protected using WPA2 PSK (Pre-Shared Key) which will change very infrequently. This way, people in the facilities can gain access to the Internet and limited MSU resources via wireless just like they can in other public areas such as various restaurants and libraries.

Step-by-step guide

1. Open the list of wireless networks available on your device.
2. Select **MSU Open**.
3. Enter the Pre-Shared Key you can find posted on signs in the included buildings.
4. If you are unable to connect, you can go to the nearest [Computer Services Help Desk](#) or contact them at 417-836-5891.

The current Pre-Shared Key is Welcome2MSU.
